

Early Learning Foundations

Early Learning Foundations Preschools

Developing through quality play-based programs

Early Learning Foundations

Developing through quality playbased programs
In association with the North Vancouver School District

You are your child's first teacher as they learn to delight in the world around them. Preschool is the next step in your child's journey through a lifetime of learning.

Preschool must be a safe, natural environment for children to explore their developing interests and abilities and to embrace their uniqueness as individuals.

Early Learning Foundations play-based preschool programs are designed to give children positive and constructive learning experiences that nurture their individuality while preparing them for school learning experiences.

Combining Play With Developmentally Appropriate Practice

Developed in partnership with early childhood educators within the North Vancouver community, these play-based programs have been designed to meet the highest and most developmentally appropriate practices and criteria to help your child gain:

Positive sense of self

Problem solving and reasoning skills

Confidence through social interaction

Creative self expression through music, art and movement

Motor skills and physical awareness through indoor and outdoor activities

Strong communication skills

Unique Affiliation

Early Learning Foundations preschools are uniquely located within North Vancouver elementary school environments, allowing preschools access to a wide array of school based resources. Preschoolers can expect inclusion in appropriate school events, and preschool teachers may also meet with kindergarten teachers, allowing for greater continuity in your child's early education.

“ The quality of care our children receive in their early years is the most important factor in their successes in school, in social relationships, as adolescents and as adults ”

Linda Reid, Minister of State for Child Care

We believe that all children are entitled to quality, universally inclusive, accessible and developmentally appropriate early childhood learning experiences.

Our educators have identified program principles, practices and resources to guide and support **Early Learning Foundations** preschools.

To read more about our principles, practices and research, please visit:
